

**PiricLawnCare - Current System
Context Diagram and Narrative
Last Updated 04/04/2020**

The Context Diagram provides an overview of the current, manual system PiricLawnCare uses to interact with their customers and scheduling his landscaping services with them.

The current processes are completely manual - either written down in various business notebooks and physical calendars or done with a smartphone.

The Customer verbally communicate their desired Job dates and services, with Piric handling the rest of the process on their own.
