PiricLawnCare
Level Zero DFD Narrative
Current System

Process 1.0 - Determine Job Availability

The current process for determining Job availability involves the Customer contacting PiricLawnCare with their desired Job service date and time. Piric would check his schedule, which is organized on a physical calendar in his home or in his smartphone, and determine if there's availability for their desired Job service date.

If this is a new Customer, Piric will record their name, contact information, and property address that's being serviced.

Process 2.0 - Schedule Job

Once an agreed upon Job service date is reached, Piric will schedule the Job for that specific date and time for the Customer. He contacts the Customer approximately 24 hours before the scheduled Job time.

Piric will record the Job and organize his daily Jobs with an agenda, which is recorded in a notebook or his smartphone.

Process 3.0 - Fullfill Jobs

Piric will carry out and complete the scheduled Jobs. The completed Job is marked as done in the Jobs agenda.
