

PiricLawnCare - New System
Context Diagram and Narrative
Last Updated 04/30/2020

The Context Diagram provides an overview of the new system's interaction between the user (Piric) and the Google Maps API. The system is accessed by Piric online through a web-based application that allows customer and job details to be saved and manipulated in the in the CRM and scheduling system.

Google Maps will validate customer address entries and provide the necessary directions for Piric to use when fulfilling a scheduled job.
